

# NORTHERN DEVELOPMENT TASKFORCE

## Site Evaluation Workshop

### BROOME

Duncan Ord – NDT secretariat  
Duncan.ord@doir.wa.gov.au

# A Vision for the Kimberley

# Back to the Big picture!

- Browse Gas development is of international significance
- Browse Gas will be part of providing energy security to major cities in China, Japan, Taiwan and probably Perth
- The gas companies are required by Government to develop the resource
- Both the Commonwealth and State Government support the development of the Browse Gas Basin.
- The NDT is charged with finding a processing option that provides **net environmental, conservation and indigenous benefits outcomes.**

# Who decides if Browse proceeds?

- Industry ultimately makes the Final Decision to proceed with a project or not and where and when.
- The State and Commonwealth have approvals powers over sites proposed for development
- The Traditional Owners are being asked for their “informed Consent” no means no site in the Kimberley.

# The “other” options

- It is not an option if industry doesn't see it as an option
- Woodside has Five options
- Inpex has Two options
- Shell has FLNG
- Industry are likely to make a decision on options by October
- NDT is not seeking to compare these options to the Kimberley option until we understand the Traditional Owner position on gas development
- A “new” NDT process would be needed to assess the impacts of the alternative options

# The NDT process

- Building up of critical information over time (approx 5 years)
  - Fatal flaw analysis (Technical, Environmental and Indigenous)
  - Site specific environmental and heritage studies
  - Regional Impact studies
  - Strategic Assessment (comparison of options)
  - Approvals and conditions
  - Continued research and monitoring

# Post workshop process

- Workshop outcomes to be compiled into second NDT report
- Completion of GIS mapping of data and constraints
- NDT, KLC, Industry and independent analysis of data and constraints
- Reporting of outcomes
- Public comment
- EPA/DEWHA opinion

# Thank You!!

- The Traditional Owners and KLC
- The presenters
- Tom and workshop team
- NDT team
