### **dust in port hedland**

I am writing to express disgust at the current dust levels in Port Hedland at the moment it is worse now than ever and I have been here 50 years, clean air is a wright not a privilege and that measurement is 50ppm all over Australia, why not Port Hedland? Make the mining companies comply it will not send them broke and why should we suffer the loss of our property value for the sake of the malty nationals please put a halt on their greed .
