

Port Hedland Dust Management Taskforce Report to Government

Public Submission

From: K McLarty

Date: 5 October 2017

Document: Email

Good morning, this email is to confirm that as property owners and residents in Port Hedland's "West End", we would love it if the current zoning was to remain in place. Or, if the zoning density was lowered, the West End zone boundary be moved west, closer to the BHP facility.

We are at [REDACTED], close to the Taplin St boundary, and have found the dust to be no worse than when we were living in Cooke Point.

Please don't hesitate to contact me via email if you need clarification or further detail.
